Dear sir/madam,

### CONSTRUCTION OF BRIDGES AND STOPPAGE OF UNAUTHORIZED SAND WINNING ACTIVITIES

We write as concern residents of Mangoase and its adjoining communities in the Akuapem South and North Municipality, to bring to your notice a pending danger on the Mangoase to Adawso Road that needs immediate attention before any disaster strikes soon.

The bridge(s) on the River Osupru located between the Mangoase Secondary School (MASS) and Pakro Junction may soon cave in due to its dilapidated nature which has also been compounded by activities of tipper trucks that continue to worsen the state of the already bad road. It is our fear that if the trucks are not stopped from plying the road in its current state and make efforts to fix the road, it will mean we are looking on to road a terrible disaster soon.

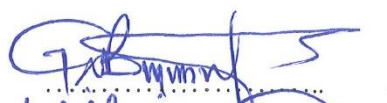

We are therefore calling on your high office to immediately take action to ensure that his looming disaster is averted.

We as concerned resident pledge our support towards any effort to addressing this concern of ours, however, we cannot promise how long we can hold on to our anxiety and fear of looming danger should your office delay in taking action on time.

We count on your cooperation.

Thank you.
